

# SP315S Infrared (non-contact) Butt Fusion Welder

The **SP315S** is an automatic welding machine for heating element infrared welding of PE, PP, PVDF and ECTFE pipes and fittings from OD 110 to OD 315 mm in the workshop or in the field. It has two large aluminum pipe clamps which accept reducers for different pipe sizes, as well as two narrow fitting clamps for fittings with short legs.

The electronically controlled infrared heating element with limit stops has a special ceramic coating and control lamps for system and interval checking. Temperature adjustment is carried out by means of a digital control unit with separate mains plug and switch. The electric planer and heater rest on precise 2-axis-guiding and glide out between the welding pieces from the protective cover when in use. A wooden box serves for the transport and the protected storage of the complete SP315 welding kit.

for PP, PPn, ECTFE  
PVDF pipe  
4" – 12" (110 – 315mm)

VOLTAGE: 400 VAC – 1 Plug

### Features:

- Ideal for PVDF, PP, PPn, ECTFE (Halar®) butt fusion piping systems
- Fully automated welding process
- Electronic process control and data logging
- Large touch screen with selectable languages
